Create ZipCode

Creates a zipcode and inserts it into the zipcode table. Asks the user to enter the information for the zipcode. The application then checks whether the input is valid and if it is, it creates a new zipcode java object and then uses zipCodeDao to put the zipcode into the zipcode table.

Create ZipCode

Matching ZipCode

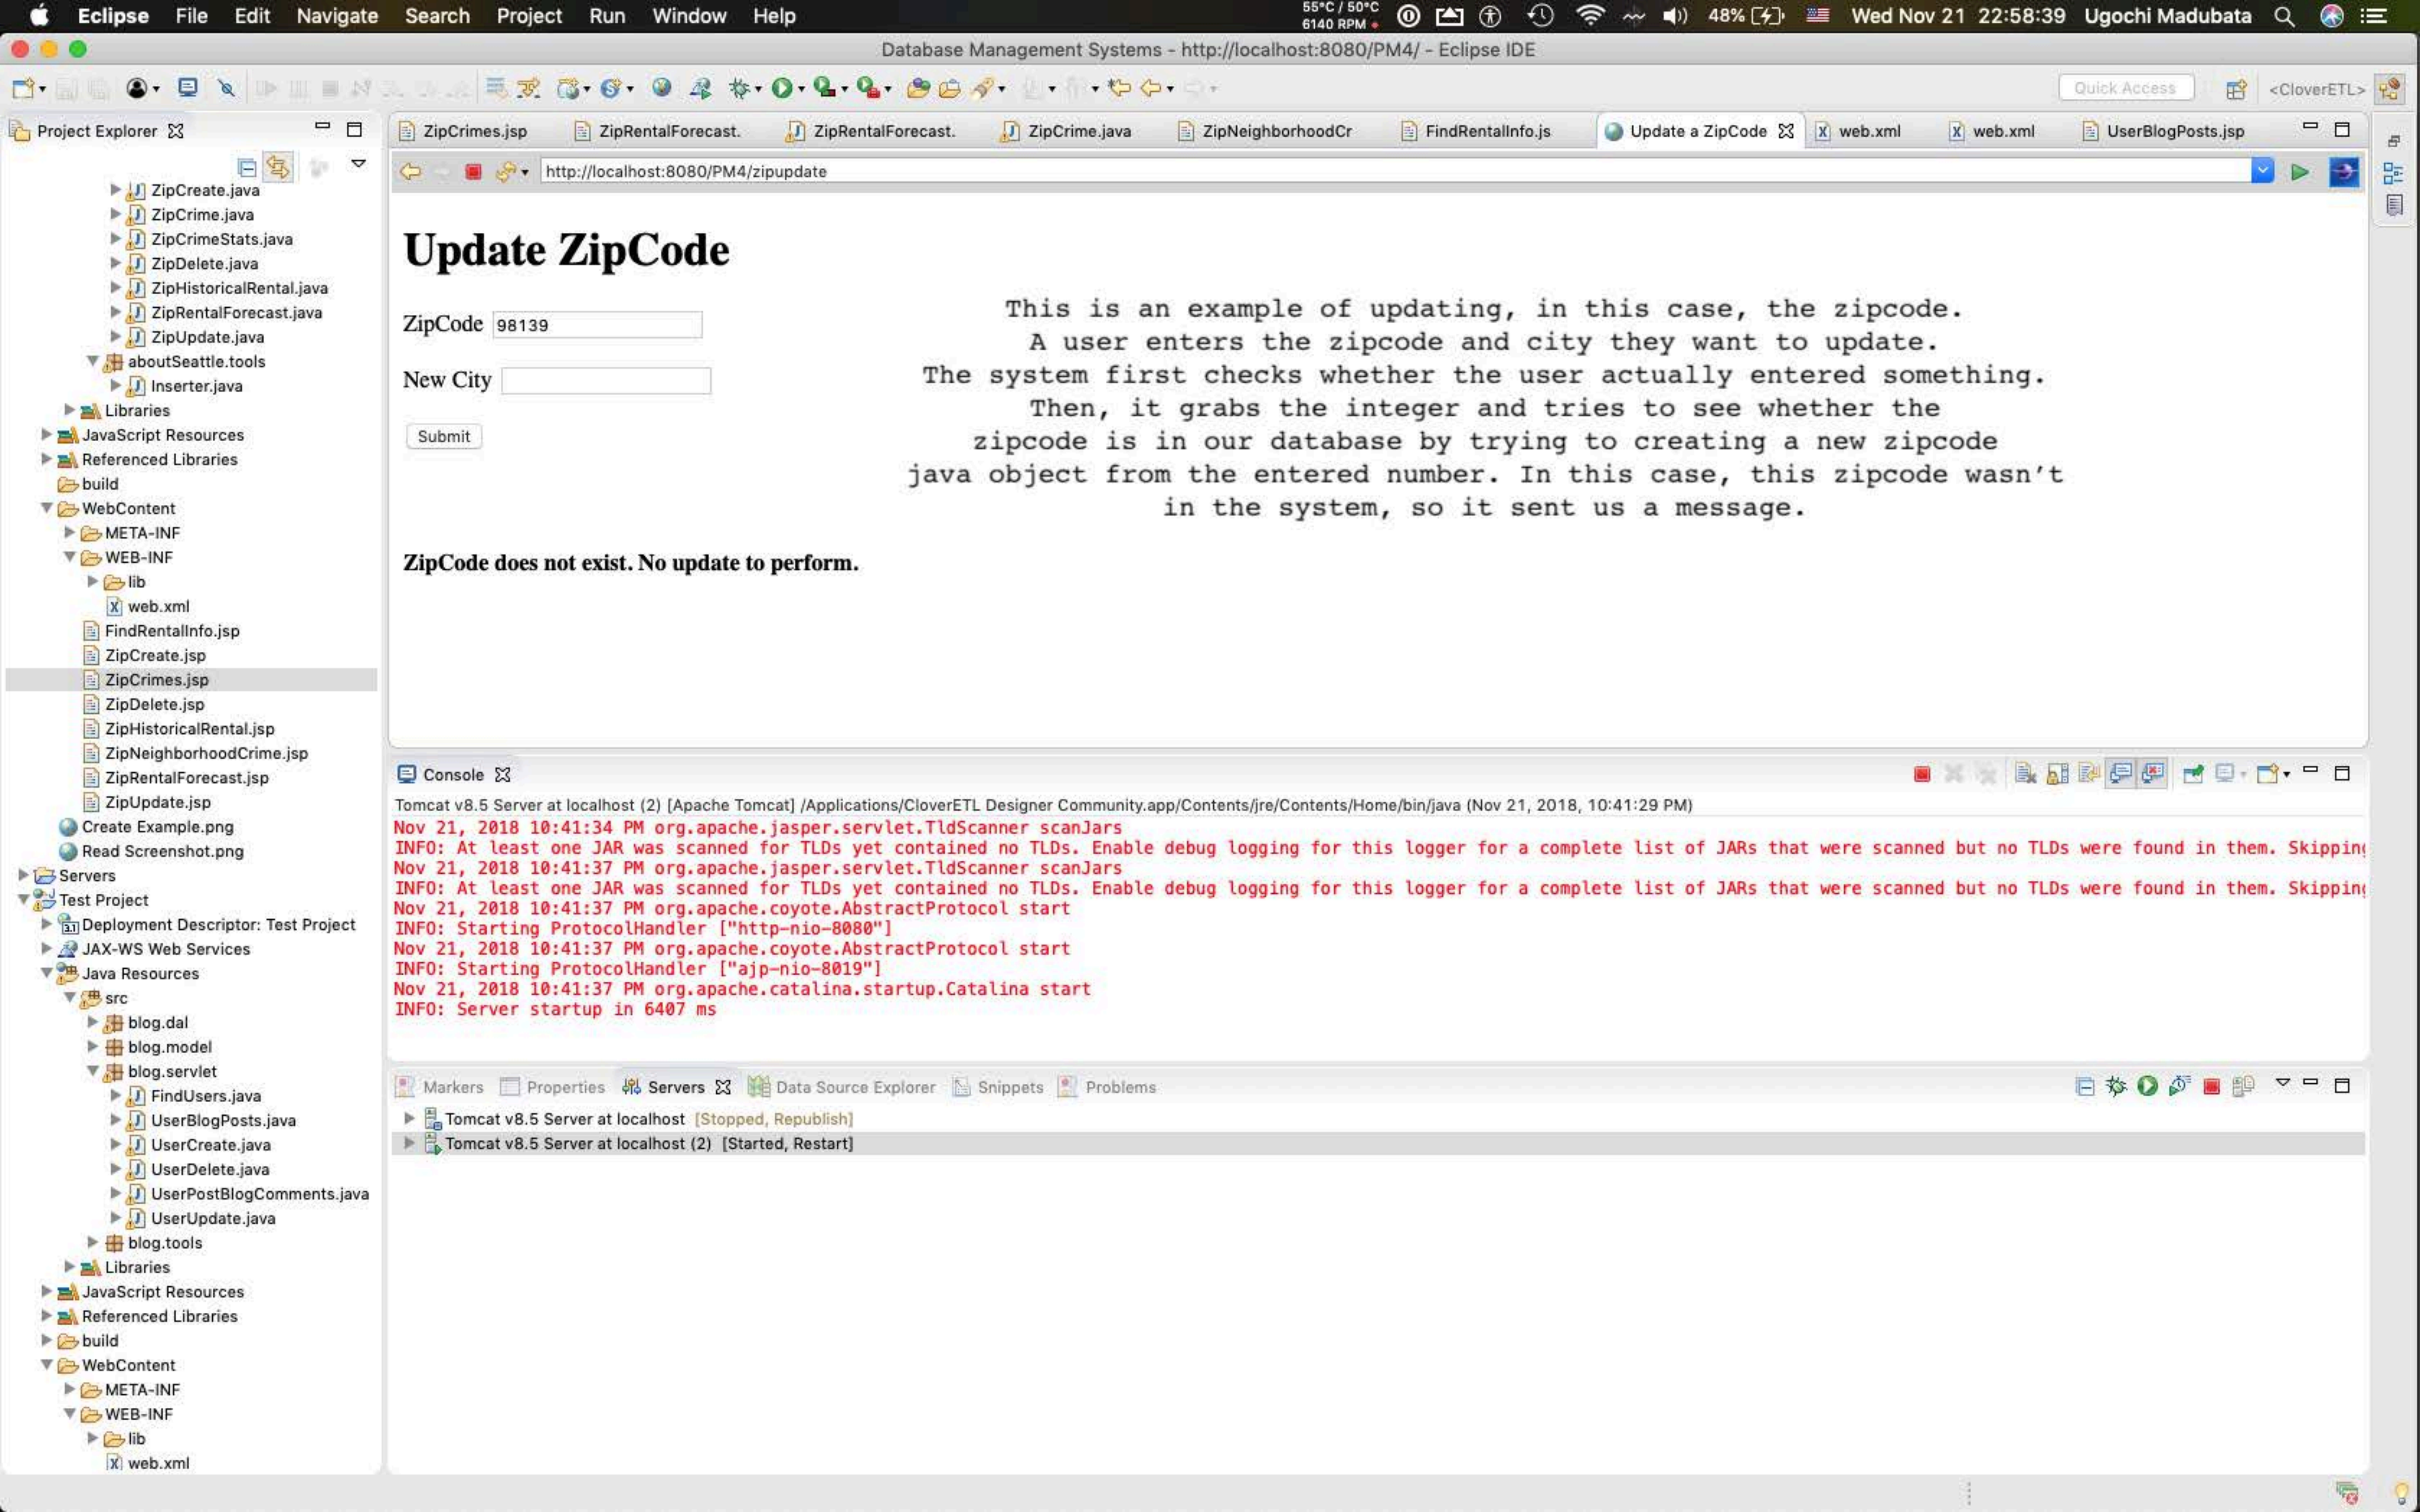

ZipCode	City	State	County	HistoricalRental	RentalForecast	Delete HistoricalRental	Update HistoricalRental	Crimes	CrimeStats
98109	Seattle	WA	King	HistoricalRental	RentalForecast	Delete	Update	Crimes	CrimeStats
98121	Seattle	WA	King	HistoricalRental	RentalForecast	Delete	Update	Crimes	CrimeStats

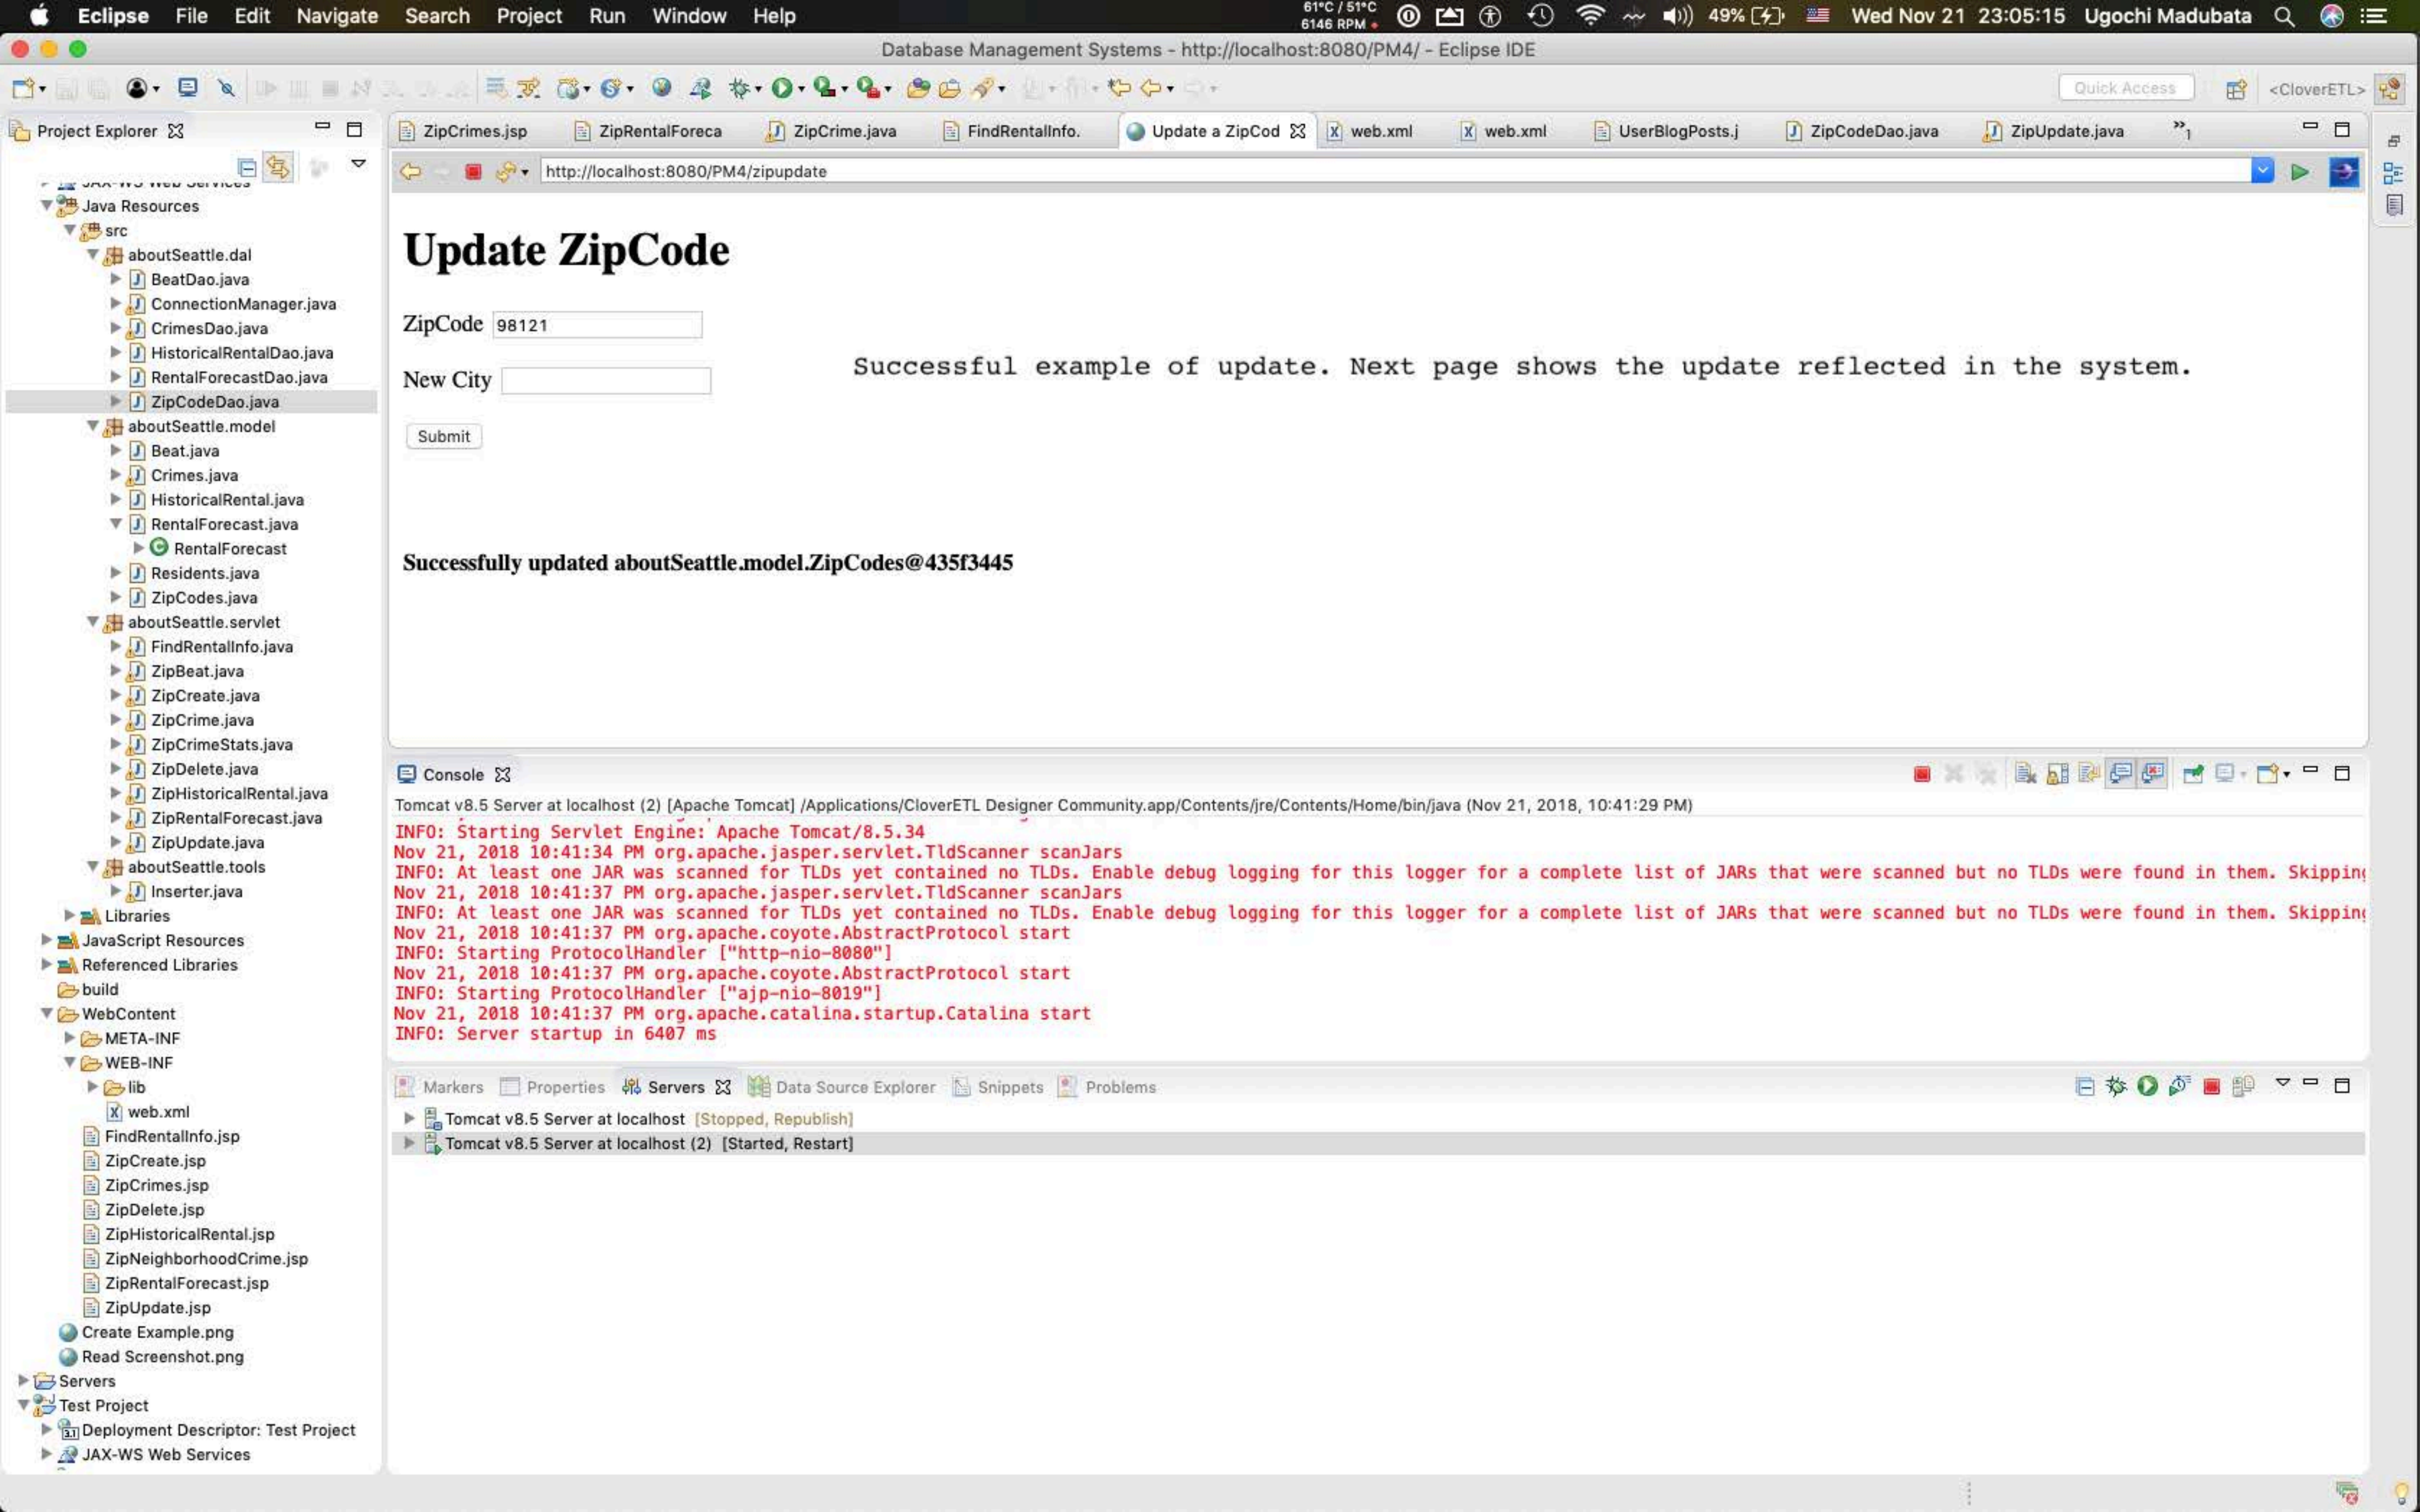

When a user initially enters the app, the program takes the city entered and then reads the zipcode table to find zipcodes associated with the city. It then displays that zipcode information along with links to historical record information, rental forecast information, crime information and crime stats information if they exist and the open to delete or update the historical record.
